

Dots and Boxes

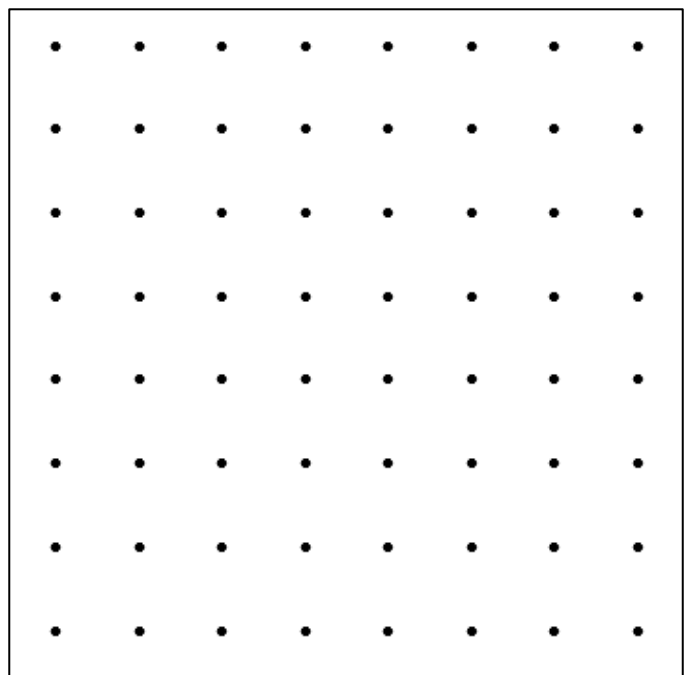

How to play:

- Players take turns joining any two adjacent dots with a vertical or horizontal line (no diagonal lines)
- When one player is able to draw a line that completes a box, they put their initial in the box and they get to take another turn
- More squares are made as the game progresses and play continues until it is impossible to complete any more squares
- The winner is the player who has the most squares at the end of the game
